Why it can know many things?

aWatch 1 has many Sensors.

Now, I'll introduce these sensors.

1st Gen Health Sensor

Measure your heart rate.

Fires one light and records your heartbeat.

When it detects a high or low heart rate,
it will let you know right away.

1st Gen Breath Sensor

Measures your breathing rate and the concentration of Oxygen taken in.

It will alert you if you are having difficulty breathing or if your Oxygen intake is low.

1st Gen Air Watch Sensor

Monitor the air.

It detects the concentration of Carbon Monoxide, Carbon Dioxide, Methane Gas, and Chlorine.

If there is a buildup of harmful gases in the room, it will tell you before you lose consciousness.

30G Acceleration Sensor

Detects acceleration, such as when you fall,
and can call an **SOS** if you are stuck.

Enviro Sensor

Measures the amount of light and the bolume of sound.

Warns you when it is too bright, too dark, or too loud, before it becomes harmful to your health.

aPay Sensor

This is the sensor that iws installed to use the credit card in aPay with aWatch 1.

aWatch 1 has

Health Sensor

Breath Sensor

Air Watch Sensor

30G Acceleration Sensor

Enviro Sensor

aPay Sensor

All 6 Sensors.

OS that installed in aWatch 1
